Progress Notes by Benjamin Keveson, MD at 9/9/2026 9:50 AM

ICU Daily Progress Note

Hospital Summary

The patient is a pleasant 66-year-old female with past medical history most significant for severe pulmonary hypertension severe tricuspid regurgitation chronic right sided heart failure thought secondary to pickwickian and chronic respiratory failure as per outside notes, atrial fibrillation on Eliquis and type 2 diabetes who is being transferred to the cardiovascular ICU for acute on chronic congestive heart failure and cardiogenic shock. Patient admitted to the hospital yesterday with hypotension and leg swelling with increased weight gain. BNP of 1100, creatinine up to 4.7, platelets 396 white blood cell 4.2 hemoglobin 7.3. Chest x-ray revealed edema. Patient was admitted to the floor and initiated on Lasix but developed hypotension and was transferred to the cardiovascular ICU.

Echocardiogram with LVEF of 55% RV severely dilated and function moderately reduced with severe tricuspid regurgitation

24 Hour Events:

Afebrile net -3 L on epinephrine 5 and Lasix 10. Creatinine downtrending 3.7. Hemoglobin stable at 6.7 without transfusion but initiated iron IV supplementation.

Assessment & Plan

The patient is a pleasant 66-year-old female with past medical history most significant for severe pulmonary hypertension severe tricuspid regurgitation chronic right sided heart failure thought secondary to pickwickian and chronic respiratory failure as per outside notes, atrial fibrillation on Eliquis and type 2 diabetes who is being transferred to the cardiovascular ICU for acute on chronic congestive heart failure and cardiogenic shock.

CHF/RV Failure/Cardiogenic Shock:
-Epi 5, lasix ggt for goal net negative 1-2 liters
-Can add diuril if needed
-MAP goal 65 as per cardiology
-apix as per cardiology, amio as per cardiology

AKI on CKD
-Lasix as per above
-RP q8h
-Foley

FEN:
-Med diet

Ppx:
-Apix

Anemia: Acute on Chronic 2/2 CKD, no sign of acive bleeding
-Will hold on transfusion as long as remains above 6.0, if not above 7 by Sunday will transfuse 1 unit
-IV iron as per pharmacist appreciated

Code:
-Palliative appreciated

Foley needed for diuresis, hopefully out in the next couple of days
Intake/Output for last 24 hours:

Intake/Output Summary (Last 24 hours) at 9/9/2026 0950
Last data filed at 9/9/2026 0900

	Gross per 24 hour
Intake	1257.69 ml
Output	4550 ml
Net	**-3292.31 ml**

Vent settings for last 24 hours:

Vital signs for last 24 hours:
Temp: [97.3 °F (36.3 °C)-97.6 °F (36.4 °C)] 97.6 °F (36.4 °C)
Heart Rate: [112-139] 132
Resp: [12-26] 15
BP: (80-144)/(38-133) 98/63

Physical Exam:
General: alert and oriented
HEENT: pupils symmetrical and reactive
Lungs: clear
Cardiovascular: regular rate and rhythm
Integumentary: anasarcic
Neuro: non focal
Ab: Soft, non tender, non distended

Critical Care Time excluding procedures: 45 minutes
